

# Adriana Latorre

Full-Stack Developer | React Native, Kotlin & GCP | Cloud Computing | Agile Methodologies

## Profile

Developer in full-stack development, focused on creating scalable and efficient solutions. Experienced in technologies such as React Native, Kotlin, Node.js, and GCP (Google Cloud Platform) for cloud infrastructure management. Skilled in RESTful API development, third-party service integration, and relational/non-relational database management. Knowledgeable in Agile methodologies like Scrum and Kanban, with a proven ability to work in multidisciplinary teams and solve complex problems. Seeking opportunities to apply my software and cloud expertise, blending execution with continuous learning.

## Professional Experience

### Tupi - Electric Mobility / november 2023 – Present

- Contributed to the development and maintenance of a high-traffic mobile app with more than 200.000 active users, enabling users to locate and manage electric vehicle charging stations.
- White-Label Solutions: Built customizable white-label applications for major clients such as BMW, BYD, SHELL RECHARGE, and VOLTZ, allowing them to deploy the app under their own branding while leveraging Tupi's core technology.
- Integrated RESTful APIs and cloud services (GCP) for real-time data processing and analytics.
- Implemented push notifications and analytics tools (e.g., OneSignal, Amplitude) to improve users engagement and retention.
- Utilized BigQuery for real-time data analysis and reporting, providing actionable to stakeholders.

### Givisiez Company - january 2023 - november 2023

- Developed an allergy patient management app using React native (TypeScript) and Firebase integration.
- APIs: Consumed and developed RESTful APIs for communication between Front-end and Back-end.
- Database: Utilized Firebase Firestore for data storage and retrieval, ensuring performance and reliability.
- Collaboration: Worked in a multidisciplinary team, including Front-end, Back-end, Q.A., and Cyber Security, following Agile methodologies.

## Education

- Estácio University Center** - System Analysis Development, Information Technology - **Present**
- Digital House Brasil** - FullStack, Computer Programming - march 2022 - sep 2022
- Senac** - Bachelor's Photography - march 2010

## Certifications

- Codans** - FullStack Java-Kotlin for Android- **Present**
- Udemy** - FullStack React-Native IOS and Android.
- Dev SumMit** - FullStack dev and software architecture, front-end & mobile development, TI mgmt, innovation transformation.
- Samsung Ocean** - Backend with node and express 2/2
- Harvard University** - CC50's Introduction to Computer Science.

## Technical Skills

- Programming Languages: JavaScript, TypeScript, Kotlin.
- Front-end: React Native, React, HTML, CSS.
- Back-end: Node.js, Express, RESTful APIs, GraphQL.
- Databases: MySQL, MongoDB, Firebase Firestore.
- Cloud Computing: GCP (Cloud Storage, Cloud Functions, BigQuery), Firebase.
- DevOps: CI/CD, Docker, Kubernetes (in progress)
- Version Control: Git, GitHub, GitLab
- Agile Methodologies: Scrum, Kanban
- Tools: Jest, Sentry, Postman, Swagger

## Languages

- Portuguese (Native)
- English (Intermediate)
- Spanish (Intermediate)
