ADRIANA LATORRE

Mobile developer

I am a **peaceful** person who loves to learn and is constantly looking for **devalopment** and personal **growth.**

After 15 years of experience as a photographer, i decided to dream further and take a new path in the field of **technology.**

I attended a preparatory course at Digital House Brasil School where i learned **JavaScript / Node.Js** stack, with ExpressJs, MongoDb, MySql and **React**, with attencion on clean code and **unitary test**. During the course i discovered **React-Native** and that´s where my interest in the **mobile** universe began. After that my curiosity took me to **Kotlin** language and i fell in love with it, then decided to dedicate my time and **study** to delve deeper on it mixing with **Java** language to learn more everyday. Now I'm looking for na **opportunity** to get into the market and **grow** with new challenges.
